Keep this record on site and available for three (3) years. If there is a problem that MAY CAUSE the release of oil or grease or if there IS a release of oil or grease into the sewer system, please contact NCSD immediately. It is required that the grease trap/interceptor be inspected at least once per month (use inspection log) to ensure proper operation. The grease trap/interceptor should be cleaned quarterly at a minimum or more frequently if necessary based on inspections. Please mail or fax completed form to NCSD.
